

About us

PPH AMG Sp. z o. o. was founded in 1990. From the beginning of its existence our company has specialized in container production for vehicle transportation. Although we also take orders for many different kinds of steel construction. With regards to the number of containers and cisterns produced our firm is the largest of its kind in Poland. 90% of the products made by our company are sold to countries outside of Poland, such as: **Norway, Germany, Sweden, Denmark, Great Britain and Holland.** Each year our firm sees growth in number and worth of contracts, making it necessary to reorganize our work and continually enlarge our company.

PPH AMG Sp. z o. o. holds a "Certificate of Management Quality Systems ISO 9001:2000 and 14001:2004" which includes "Container production, steel bins and other steel construction". Our company first received this certificate in May of 2000. Our company also holds the right to produce liquid fuel tanks which was given to us by **SP Sverige Proxnings & Forsknings - Institut (Swedish institute for research and testing)**. Our company also holds a certificate and the authority to weld using **DNV (Det Norske Veritas)** for the production of containers for particular use on **offshore platforms.**

Our company also produces:

- **Hooklift containers** complies with the requirements of SS-3021 standards or with the customers guideline, the capacity of the container is 10-49 m³.
- **Type "Open Lift"**, built according to SS-3020 standards with a capacity of 1 - 12 m³, while the thickness of the metal used varies according to the order.
- **Type "Combo"**, built according to DIN 30720 standards with a capacity between 2,5 - 12 m³ while the thickness varies according to the demands of the client. The lids on these bins are equipped, however if the customer so pleases in steel, aluminum and PCV lids can be added.
- A wide variety of containers built in accordance to German standards **DIN30720 and DIN3072-1.**
- **Storage container** the length of 8 to 10 feet, adapted for vehicle transport or fork lifts and equipped with anti-leak double wing doors which ensure that no water will leak into the container.
- **Oil reservoirs** according to clients demands.

PPH AMG Sp. z o.o. from the beginning of its existence, has developed its business to best meet the needs and expectations of its clients. We are constantly introducing new innovations and pursuing investment (this includes the continuous weld, a replacement for the sand blaster, and the purchase of a new painting chamber) with the goal of not only appeasing consumers but to go much further than their expectations.

We promise our clients exceptional attention toward two basic parameters with regard to the products we offer: quality and price, and one of the basic advantages of PPH AMG is that we offer our clients advice with well-grounded, workable and modern solutions, which in turn improves the quality of their business.

COMBO CONTAINERS

www.amg.pl

Combo containers

P.P.H. AMG offers a wide variety of containers that use a back and lift-dumper loading system, which comply with demanded SS3020 Swiss consumer standards. Container capacity varies between 4 - 12 m³. The containers can be made with any thickness of steel sheeting that the customer desires using **S235 or S355 grade**.

The standard paint for these bins is alkaline paint with the colour taken from the RAL Catalog. We can also paint our containers in accordance to customer demands.

Area of use:

- for the storage, segregation and transportation of waste and recyclables.
- transport and storage of construction material and waste
- handy use for storage or as a transport device
- transportation of muddy soil
- for particular use for draining liquid from stored waste
- many other uses meeting every wish of the customer

1. Open Combo

Technical specification:

- Version "C"
- capacity: 8-10m³,
- thickness of steel sheets bottom: 4mm / side walls: 3mm,
- back and lift-dumper loading system,

Special Options:

- forklift pocket under the bottom
- logo plate
- other dimensions on request,
- special paint,

2. Close Combo MC

Technical specification:

- capacity: 4-12m³,
- thickness of steel sheets bottom: 4mm / side walls: 3mm,
- steel lids in front,
- steel door on each side,
- back and lift-dumper loading system,

Special Options:

- aluminum lids in front – symbol AL,
- side opening with rubber flaps – symbol R,
- side opening for glass – symbol G,
- side opening for paper – symbol P,
- side opening cylindric hatch – symbol SW,
- other dimensions on request,
- special paint,

...but we know how to make Containers.

3. Close Combo Flexi

Technical specification:

- capacity: 2,5-10m³,
- thickness of steel sheets bottom: 4mm / side walls: 3mm,
- aluminum lids in front,
- back and lift-dumper loading system,

Special Options:

- side steel door – symbol SH,
- side opening for glass – symbol G,
- side opening for paper – symbol P,
- side opening cylindric hatch – symbol SW,
- other dimensions on request,
- special paint
